## DECLARATION OF CONFORMITY Nr. 2025–14

The following product is intended for use as a joint detail in concrete works. The product has a roughened surface to ensure better adhesion to concrete.

The product can be quickly and conveniently cut to the desired length. It is suitable for use together with various cones and accessories.

Prolonged intensive exposure to light (UV radiation) may damage polyethylene (PE) products. During storage, the products must be protected from direct sunlight, for example with a black packaging or covering film.

Material: Polyethylene (PE)
